

72" Brow Light

57 LED 3 Piece Scene Light

FT-B-72-3PKIT

ABOUT THE BROW LIGHT

Thinner, Brighter, and Guaranteed Forever. That's the FireTech way. The FireTech Brow Light is the ultimate lighting solution for the front of your Fire Apparatus. There is a reason it is trusted by some of the nation's largest fleets.

Available with optional Integrated DOT Marker lights and split circuits, this product is the first fixture specifically designed from the ground up for use on the front of an apparatus cab to illuminate the roadway. One of the secrets to the success of the FireTech Brow Light is the ability to attach the light at multiple points along the extrusion. This variation, the FT-B-72-3PKIT, breaks our standard 72" FireTech Brow Light into 3 shorter sections that can be installed on cabs where the roof line is radiused. E-ONE "Quest", Pierce "Impel", Sutphen and Rosenbauer Cabs are all excellent candidates for the 3 Piece variant of the FireTech Brow Light.

Key Features:

- 5w LEDs with precision acrylic optics
- All Aluminum Extrusion
- Multiple Mounting Options
- Split Circuit Optic Control

FT-B-72-3PKIT SPECS

RAW LUMENS	30,096
EFFECTIVE LUMENS	21,067
WATTAGE	285W
TOTAL AMPERAGE	23.75A @12V DC
CIRCUIT 1 (SPOT) AMPERAGE	3.75A @12V DC
