ABOUT THE TRUNNION MINIBROW LIGHT

The MiniBrow Series uses the same core extrusion technology as the FireTech Brow Light, but are offered as single-circuit solutions for use in virtually any other area of a fire apparatus. Offered in 3 sizes only, the Trunnion Series make for simplified installation in areas where access to the back side of a panel is difficult, or when extreme adjustability is required. The trunnion bracket also allows for mounting on the side of an apparatus where some angling would be expected and difficulties in installation might be encountered.

60 POINT LOCKING AIMING SYSTEM

The sturdy trunnion bracket allows the MiniBrow to be precisely aimed regardless of mounting location. Enjoy full rotation flexibility from an ultra low profile housing.
