

SHOCKWAVE LIGHT

FT-CSW-112-*--**-B

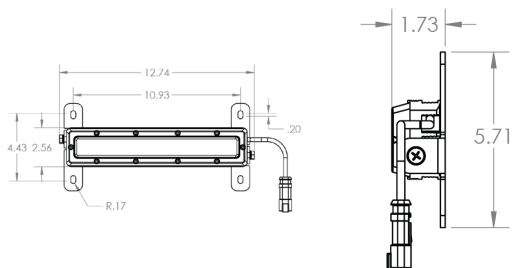

KEY FEATURES:

- Cube Shaped LEDs Produce 180° of Light
- DC or AC Operation
- Dimmable

ABOUT THE SHOCKWAVE

The Shockwave excels at being a durable fluorescent upgrade for flat mount applications in many environments. CUBE LEDs differ from standard diodes primarily in size and output per watt. A CUBE LED has a larger surface area allowing more-light to be emitted per individual watt. Additionally, having a larger surface area gives the LED a much wider beam pattern allowing more lux to illuminate a wide-spread area and avoid shadows as you work underneath the fixture. These features combined with an LED color temperature of 5000K make this fixture ideal for interior vehicle illumination.
