

WIDE FLOOD LIGHT

FT-CU-P500

KEY FEATURES:

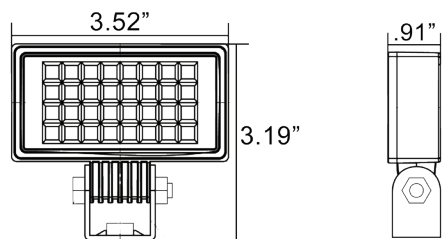

- Wide Dispersing Light
- Suitable for Various Locations
- Rugged

ABOUT THE MULTIPURPOSE WIDE FLOOD LIGHT

When you need to illuminate something very close to the light source (undercarriage, work area, engine bay, compartment area etc) the FT-CU-P500 Utility light is the ticket. By bringing the LED chips all the way up to the lens and forgoing installation of an optic collimator, the P500 produces a widely dispersed light pattern. It does not really matter how you aim the light, you'll get a ball of illumination 10-20' from the source with gradual dispersion in all directions.

DIMENSIONS
