

GUARDIAN® JR HYBRID LIGHT

CRACK-FREE CORNER DESIGN

Screws never come in contact with corner plastic, preventing cracking and moisture intrusion.

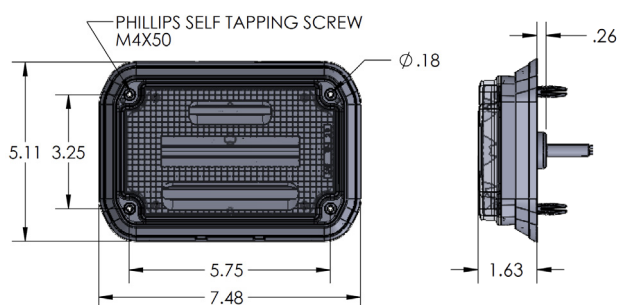

NITTO TEMISH VENT & ALUMINUM HEAT SYNC

The Nitto TEMISH Vent allows moisture to vent ensuring no unwanted condensation or water droplets trapped in the lens and the heat sync keeps the fixture from overheating.

TWO FIXTURES IN ONE!

When addressing price sensitivity in the EMS market, one way to drive system cost down while increasing reliability and performance is to use fewer fixtures of a superior build quality. Sure, the individual fixture may be more expensive than a legacy part, but you only need 1/2 as many. Consider a FireTech® Guardian Hybrid Warning / Scene Light for your next project if budget or real estate are your limiting factors!
