

8" ROUND DOME LIGHT

FT-IDL-8RD

KEY FEATURES:

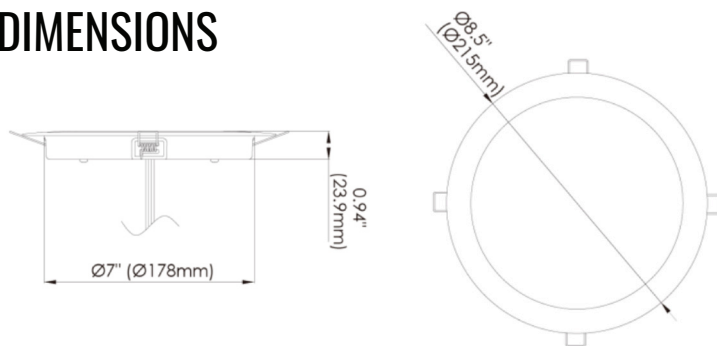

- Spring-Clips for Easy Installation
- Diffused Lens for Optimal Light Distribution
- Low and High Power Output Modes

ABOUT THE 8" INTERIOR DOME LIGHT

The back of the ambulance is where the action happens – where Paramedics and other First Responders put their training to work to help their patients. It's critical that the dome lights make it easy for the crew to see what they're doing.

We chose a higher color temperature and color rendering index than most, helping you see subtle differences in colors so you can access veins faster. These fixtures also use a highly diffused lens to distribute light all around the inside of the patient module. Lastly, the FireTech dome light is easy to install with spring-clips, which makes both mounting and future service needs easy.

DIMENSIONS

PART#: FT-IDL-8RD

RAW LUMENS	1380
EFFECTIVE LUMENS	820
DIMENSIONS	8.5" X 7" X 0.94"
WEIGHT	0.8 LBS.
AMP (@12V DC)	1.02A
WATTS	12.24W
INPUT VOLTAGE DC	12V DC
LED COLOR	WHITE
CERTIFICATIONS	ECE R10; AMD 016
