## ABOUT THE 4 LED WORK AND AREA LIGHT

The WL-2000 was designed as an ultra-reliable entry level utility flood and work light for use on fire apparatus. It is one of the smallest fixtures in the industry with a photometric footprint capable of meeting the NFPA 1901 requirements when used on the rear of an apparatus, or in areas like dunnage, hose bed, or walking surfaces. This fixture costs similar to others on the market of similar size but performs like no other. Cost effective, bright, and ultra reliable.
