ABOUT THE 9 LED WORK LIGHT

Sometimes you need more flexibility from your scene lights than what is bolted to your apparatus. That's where this adjustable work light comes in! Coupled to this innovative swivel/handle assembly, the WL-X-9 work light is one of the most versatile utility fixtures on the market. With the adjustable mount, you can point this fixture at whatever you are working on without having to unbolt the light or use any tools. High-quality construction and components enable the WL-X series to withstand vibration up to 21Grms. Built-in reverse polarity protection helps prevent accidental damage caused by incorrect installation. Electronic thermal management ensures that if the light is subjected to a massive heat overload, that a self-protection protocol is engaged to reduce the light output, until such time as the heat overload retreats to normal parameters.
